

Uploading Report Definitions to RecordPoint

RecordPoint reports can be found in the browser in the Reports section in the RecordPoint navigation menu. Custom reports that have been defined in Report Builder can be added to RecordPoint by uploading the report definitions into the site.

Uploading Report Definitions to RecordPoint

To upload a report from Report Builder:

- Open the Project menu
- Select Properties
- In the Configuration list, set `OverwriteDataSources` to true
- For `CustomDataSourceFolder`, set the value to `http://<RecordPointURL>/Reports`
 - Where `<RecordPointURL>` is the URL for the RecordPoint site collection
- Click OK
- Click Deploy to deploy the solution to the RecordPoint report library

More Information

For more information, see the Microsoft Documentation on uploading report definitions: <http://msdn.microsoft.com/en-us/library/bb283155.aspx>
